How do you determine if a number is even or odd? To determine whether a number is even or odd, it is divided by 2. If the remainder obtained after division is 0, then the number is referred to as an even number. On the other hand, when the remainder is not equal to zero, then the number is called an odd number.

Python Program to Check if a Number is Odd or Even - Toppers : guides : python-guide : examples : python-examples
