

O O bet365

Iridium was originally found as a contaminant (with the element osmium) by Tennant and Young in 1803. It was dissolved in a mix of sulphuric and hydrochloric acids that Tennant made his discovery of both elements.

Iridium - Element information, properties and uses | Periodic Table

Astatine was discovered by D. Corson and co-workers in 1940 by bombarding a bismuth target with alpha particles. The most stable isotope of this element has a half-life time of only 8.1 hours.
