Solar flares are powerful bursts of energy known to impact electric power grids, navigation signals, radio communications and can pose risks to spacecraft and astronauts

Watch: Sun emits strongest solar flare in years - BBC

news : world-67734790

Intense currents driven by space weather can have severe impacts, damaging or destroying critical infrastructure, interrupting the internet and other communications and leading to power outages. The federal government is already making plans to prepare for and respond to the next big solar storm.
