However, if you want to see a list of dependent variables, the following table shows the results of the regression analysis. The dependent variable is the number of visits to the website, and the independent variables are the number of ads, the number of keywords, and the number of backlinks. The results show that the number of ads is a significant predictor of the number of visits, with a positive coefficient. The number of keywords and the number of backlinks are also significant predictors, but with negative coefficients. This suggests that having more ads, keywords, and backlinks leads to more visits to the website.
