The gambler's fallacy is the mistaken belief that past events can influence future events that are entirely independent of them

in reality. For example, the gambler's fallacy might cause some one to believe that if a coin just landed on heads twice in a row, then it's

due to land on tails on the next toss. The gambler's fallacy might cause some one to believe that if a coin just landed on heads twice in a row, then it's

due to land on tails on the next toss. The gambler's fallacy might cause some one to believe that if a coin just landed on heads twice in a row, then it's
