Some say it's luck 📉 predicti ng corners in a football game, but we at AFootballReport find in corners very pr ofitable markets especially in live events 📉 when odds go very high as the game evolves. So how do we predict corners? Of course as any other football & #128201; prediction and corners are related to a number of pre-match and team f actors. First of all we should see the 📉 type of game we're looking for or the type of game we want to predict. Is it a game with 📉 a stro ng favorite or just two equally strengthen teams that play. If it's a game w ith a strong favorite probably 📉 we should pay attention to the corners race predictions as strong favorites always keep the ball in possession more th an 📉 the other teams and create more chances as they push forward almost t during the whole game. Keep in mind in 📉 live events that if the scor e is in favor of the favorite team then this team would not be so 📉 mot ivated to create chances and would probably win less corners than in a draw even t or from behind.</p> <p>Second thing we 📉 should use when making our corners tips is t lineups and tactic for the upcoming game. Target 📉 tea ms with more offensive tactics and teams that use wingers heavily in their attac ks. For example, some good wingers for 📉 the home team could easily produce more than 10-20 crosses in the penalty area which very often defenders clea r in 📉 corners.</p> <p>Corners in the late stage of the game are more likely to happen than in the early minutes. Usually teams 📉 are very careful in the opening min utes of a football game and they try to enter the game more passively 📉 than aggressively. As the game continues depending on whether a team is losing or winning the game is leading to 📉 pushing forward and sending more pl ayers to attack or defend. This leads to significantly increasing the number of corners in 📉 the last minutes and that is what we want when predicting

<p>Spot derby games. Derby games are always poor in 📉 goals, but

very rich in corners and bookings and cards especially. No one wants to lose a d

corners.</p>
