This is the point in a tournament where the next player out does not take any winnings. The remaining players will take something away from the table.

Example: The tournament you are in states that the top 25 players will win money and there are 26 players left. These 26 players are on the bubble. The one player that is knocked out and gets no reward is said to have been knocked out on the bubble.

Two general categories of bubble player:

Playing to win: This player's intention is to take no prisoners.

They are playing to win the tournament and have every intention of using this period to their advantage in order to accumulate more chips.

There is no easy way to put it. Being knocked out on the bubble hurts, but it is important not to dwell negatively on the fact for too long.

Remember you got to within one of taking something home. With positive analysis of mistakes made during play, you can determine how plays could have been made differently.
