&lt;p>&lt;/p>&lt;p>Football corners predictions is one of the fairly new tips offered by tipsters and by us. Some say it&#39;s luck &#127818; predicting corners in a football game, but we at AFootballReport find in corners very profitable markets especially in live events &#127818; when odds go very high as the game evolves.So how do we predict corners? Of course as any other football &#127818; prediction and corners are related to a number of pre-match and team factors. First of all we should see the &#127818; type of game we&#39;re looking for or the type of game we want to predict. Is it a game with &#127818; a strong favorite or just two equally strengthen teams that play. If it&#39;s a game with a strong favorite probably &#127818; we should pay attention to the corners race predictions as strong favorites always keep the ball in possession more than &#127818; the other teams and create more chances as they push forward almost during the whole game. Keep in mind in &#127818; live events that if the score is in favor of the favorite team then this team would not be so &#127818; motivated to create chances and would probably win less corners than in a draw event or from behind.&lt;/p>  
&lt;p>Second thing we &#127818; should use when making our corners tips is to see the teams lineups and tactic for the upcoming game. Target &#127818; teams with more offensive tactics and teams that use wingers heavily in their attacks. For example, some good wingers for &#127818; the home team could easily produce more than 10-20 crosses in the penalty area which very often defenders clear in &#127818; corners.&lt;/p>  
&lt;p>Corners in the late stage of the game are more likely to happen than in the early minutes. Usually teams &#127818; are very careful in the opening minutes of a football game and they try to enter the game more passively &#127818; than aggressively. As the game continues depending on whether a team is losing or winning the game is leading to &#127818; pushing forward and sending more players to attack or defend. This leads to significantly increasing the number of corners in &#127818; the last minutes and that is what we want when predicting corners &lt;/p>
